EXPOSURE LIMITS

OSHA: Not established

ACGIH: Not established

OTHER: Not applicable

SECTION VI - EFFECTS OF OVEREXPOSURE

ACUTE: Sodium bicarbonate is a GRAS (generally recognized as safe) food ingredient. No significant toxicity is expected. May be irritating to the skin and eyes.

CHRONIC: (Effects considered include: Sensitivities, carcinogenicity, teratogenicity, mutagenicity, synergistic products, and any medical conditions generally recognized as being aggravated by exposure.): Administration of large doses of sodium bicarbonate to patients with renal insufficiency can produce systemic alkalosis.

EMERGENCY AND FIRST AID PROCEDURES

EYES: Flush with water for at least 15 minutes. If irritation persists, obtain medical attention.

SKIN: Wash with plenty of soap and water for 15 minutes. If irritation occurs and persists, obtain medical attention.

INHALATION: Remove from exposure. If discomfort occurs and persists, obtain medical attention.

INGESTION: Drink water to dilute. Obtain medical advice by phone.

DECONTAMINATION PROCEDURE: Wash with soap and water.

NOTES TO PHYSICIAN: Internal toxicity is low. Treatment follows standard protocols and is otherwise symptomatic and supportive.

SECTION VII - SPECIAL PROTECTION INFORMATION

VENTILATION REQUIREMENTS: Use general room dilution or local exhaust ventilation when excessive dust is expected in the work environment.

RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT

RESPIRATORY: Where NIOSH/MSHA approved dust respirator if excessive visible dust levels are expected.

SECTION VIII - STORAGE AND HANDLING

NOTE: Please use this statement to satisfy the in-plant labeling requirements of the OSHA Hazard Communication Standard 29 CFR 1910.1200.

Store in cool, dry areas and away from other chemicals that may contaminate product. Minimize the free fall when handling to minimize the dust generated. Wear eye protection and MSHA/NIOSH approved dust respirator to prevent irritation where excessive dust may be expected. Carbon dioxide gas can form in confined spaces if sodium bicarbonate contacts acids. Do not enter confined spaces until they have been well ventilated and carbon dioxide and oxygen levels have been determined to be safe. Continue to monitor atmosphere for oxygen deficiency.

SECTION IX - DISPOSAL, SPILL OR LEAK PROCEDURES

PROCEDURE FOR A RELEASE OR SPILL: Sweep up as much as possible for salvage or disposal. Wash away residue with water.

WASTE DISPOSAL METHOD: If material cannot be salvaged, the preferred method of disposal is in a secured landfill in accordance with all local, State and Federal environmental regulations. Empty containers may be incinerated or discarded as general trash.
